## Sociology A.A.

Sociology is the scientific study of society. It is a social science that studies social interactions and social structures, as well as stability and change in social life. It considers how social relationships influence individual behavior, and how societies (the sum total of those relationships) develop and change over time. Sociology covers everything from the analysis of brief, wordless contacts between strangers on a train to the rise of social movements and of global, socio-technological processes.

### Articulation Agreements

**CUNY Brooklyn College**  
 B.A. in Sociology  
**CUNY John Jay College of Criminal Justice**  
 B.A. in Sociology
